MORE IMPORTANT THAN

Your wife's birthday*
Rotating your tyres
The footy score
Climate change
Returning your rent a car
Election promises

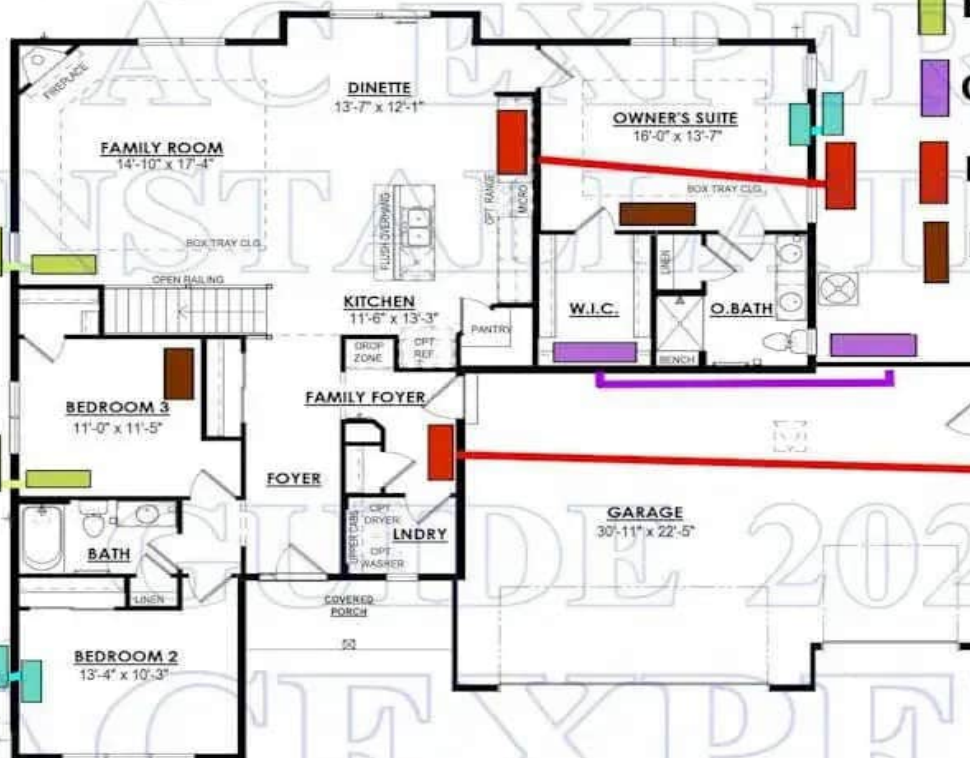

NOT AS IMPORTANT AS

Your own birthday
Having tyres
Keeping your arms inside the vehicle
Changing your underwear
An emergency chute attached to anything
Staying out of jail

Pronoun surcharge \$ Double

As of 2025 Sending emails to AC Expert with pronouns listed anywhere attracts the pronoun surcharge.

Any mention of pronouns during the day results in instant PS correction. Unhappy with our Pronoun Surcharge then it's double triple. And a stern talking to from management.

These prices are complete. Bracket, power, commissioning, GST. Do not add these to the front page ones. The front page price is for us to supply and install. The ones above are installation of your unit. On your wall.

Merry Christmas 2027 If you have been sent this quote after 31 December then it just means we haven't got around to making a new one: the prices are still valid. If you read this in 2029 it's probably out of date and I have almost certainly won gold lotto by now. Send me a postcard.
